PROFESSIONAL SUMMARY

CompTIA Security+ certified Cybersecurity Management and Analytics graduate with hands-on SOC experience in SIEM monitoring, alert triage, and incident investigation. Led a NIST SP 800-171 compliance assessment supporting Defense Industrial Base requirements, evaluating 100+ controls and documenting remediation strategies for stakeholder review. Comfortable with query languages, scripting fundamentals, and Office 365, with a disciplined, playbook-driven approach to documentation and escalation.

Security Operations: SIEM Monitoring, Alert Triage & Escalation, Threat Detection, Incident Response/Coordination, Security Investigation Documentation, MITRE ATT&CK, CVSS

Compliance & Risk: NIST SP 800-171 Assessment, Defense Industrial Base (DIB) Compliance Support, Risk Documentation & Reporting

Technical: Wireshark, Nmap, Linux (Permissions, Ownership, Networking Tools), PowerShell, Bash, Python, SQL, Java, HTML, VBA, Microsoft Office 365

Professional: Written & Verbal Communication, Customer Consultation, Team Collaboration, Independent Problem-Solving

CERTIFICATIONS

- CompTIA Security+ (SY0-701) — Earned 2026
- Mastercard Cybersecurity Virtual Experience Program, Forage (March 2024): Identified and reported phishing threats; evaluated business units to design and implement targeted security awareness training programs

EXPERIENCE

Assembler — Lexatys LLC

Laurel, DE

June 2024 – July 2026

- Partnered with the IT team to assess a 100+ requirement NIST SP 800-171 compliance framework supporting Defense Industrial Base security standards, identifying 8 unmet controls and researching remediation solutions for stakeholder review
- Documented findings and communicated risk clearly to stakeholders, applying a structured, checklist-driven review process comparable to SOC investigation workflows
- Applied precision and quality standards while operating equipment and inspecting finished products, tracking production data to uphold quality control standards

PROJECTS & INDEPENDENT STUDY

TryHackMe SOC Level 1 Pathway

jessebski.github.io/tryhackme.html

Independent Study

- Built hands-on skills in SIEM analysis, log investigation, alert triage, and threat detection across guided security operations scenarios
- Investigated a simulated SIEM alert using a structured 5 Ws framework (What, When, Where, Who, Why) to determine severity, confirm legitimacy, and document a clear conclusion — mirroring the triage-to-escalation workflow used in a live SOC

Virginia Tech Project Management Course

jessebski.wixsite.com/deca-digital-hub

Project Manager | August 2025 – December 2025

- Led a team of 4 students in designing and delivering a fully functional website for a local high school DECA club, completing the project on time with exclusively positive client feedback
- Directed project planning, task delegation, and weekly progress tracking using Agile sprints while coordinating requirements directly with stakeholders
- Maintained full documentation of milestones, scope changes, and approvals — a discipline directly applicable to shift-change documentation and case notes

EDUCATION

Virginia Tech, Pamplin College of Business

Blacksburg, VA

B.S., Business Information Technology — Cybersecurity Management and Analytics | Dean's List: Fall 2022

2025
