PROFESSIONAL SUMMARY

CompTIA Security+ certified Cybersecurity Management and Analytics graduate with hands-on SOC experience in SIEM monitoring, alert triage, and incident investigation using structured frameworks like the 5 Ws, MITRE ATT&CK, and CVSS. Comfortable with query languages, scripting fundamentals, and compliance documentation, with a disciplined, playbook-driven approach to investigation, escalation, and stakeholder communication.

SKILLS

- Security Operations: SIEM Monitoring (Splunk, Elastic Stack/Kibana), Alert Triage & Escalation, Threat Detection, Incident Response, EDR, SOAR, MITRE ATT&CK, CVSS, 5 Ws Reporting, MTTD/MTTA/MTTR.
- Compliance & Risk: NIST SP 800-171 Assessment, Defense Industrial Base (DIB) Compliance Support, Controls Gap Analysis, Risk Documentation & Reporting.
- Technical: Wireshark, Nmap, Active Directory, Linux, PowerShell, Bash, Python, SQL, Java, HTML, VBA, Jira, TheHive, Microsoft Office 365.
- Professional: Written & Verbal Communication, Customer Consultation, Team Collaboration, Independent Problem-Solving.

EDUCATION & CERTIFICATIONS

Virginia Tech, Pamplin College of Business - 2025

Blacksburg, VA

B.S., BIT — Cybersecurity Management and Analytics | Dean's List: Fall 2022

Certifications

- **CompTIA Security+ (SY0-701)** — Earned 2026.
- **Mastercard Cybersecurity Virtual Experience Program, Forage:** Completed a job simulation where I served as an analyst on Mastercard's Security Awareness Team. Analyzed and identified which areas of the business needed more robust security training and implemented training courses and procedures for those teams.
- **Datacom Service Desk Agent Virtual Experience Program, Forage:** Developed expertise in ITIL processes, specifically in categorizing, logging, and escalating incidents, ensuring alignment with industry best practices for efficient service management.

PROJECTS & INDEPENDENT STUDY

TryHackMe SOC Level 1 Pathway

Independent Study | jessebski.github.io/tryhackme.html

- Built hands-on SOC analyst skills across guided security operations scenarios, covering SIEM log analysis, alert triage, and threat detection aligned to MITRE ATT&CK techniques.
- Investigated a simulated SIEM alert using a structured 5 Ws framework (What, When, Where, Who, Why) to determine severity, confirm legitimacy, and document a clear disposition — mirroring the triage-to-escalation workflow used in a live SOC.

Client Website Project — DECA Club

August 2025 – December 2025

Project Manager, Virginia Tech Course Engagement | jessebski.wixsite.com/deca-digital-hub

- Led a team of 4 in designing and delivering a fully functional website for a local high school DECA club, completing the project on time with exclusively positive client feedback.
- Directed project planning, task delegation, and weekly progress tracking using Agile sprints while coordinating requirements directly with stakeholders to define goals and success metrics.
- Maintained full documentation of milestones, scope changes, and approvals — transferring full ownership and operational control upon project completion.

EXPERIENCE

Assembler — Lexatys LLC

June 2024 – July 2026

Laurel, DE

- Partnered with the IT team to assess a 100+ requirement NIST SP 800-171 compliance framework supporting Defense Industrial Base security standards, identifying 8 unmet controls and researching remediation solutions for stakeholder review.
- Documented findings and communicated risk clearly to stakeholders, applying a structured, checklist-driven review process comparable to SOC investigation and case-documentation workflows.
- Applied precision and quality-control standards while operating equipment and inspecting finished products, tracking production data to identify deviations and uphold quality assurance benchmarks.
